The diagram shows a table structure labeled **35** representing a content server mapping. The table has two main sections. The first section, labeled **content server**, contains three rows. The first row has two columns labeled **content service** and **service ID**. The second row also has two columns labeled **content service** and **service ID**. The third row is empty. The second section, also labeled **content server**, contains two rows. The first row has two columns labeled **content service** and **service ID**. The second row also has two columns labeled **content service** and **service ID**. The entire table is enclosed in a dashed rectangular boundary.

<i>content server</i>	<i>content service</i>	<i>service ID</i>
	<i>content service</i>	<i>service ID</i>
<i>content server</i>	<i>content service</i>	<i>service ID</i>
